MUAC MEASUREMENT & ACUTE MALNUTRITION JOB AID

Reference: TRN-NUTR-02 / Lesson 3 (Downloadable Field Card)

1. MUAC COLOUR CODE (children 6-59 months)

GREEN ≥ 12.5 cm Normal nutrition status. Counsel the caregiver.

YELLOW 11.5 - 12.4 cm . Moderate Acute Malnutrition (MAM).

RED < 11.5 cm Severe Acute Malnutrition (SAM). Refer today.

2. MEASUREMENT STEPS

- Use the LEFT arm; the arm must hang relaxed at the side.
- Find the mid-point between the shoulder tip and the elbow tip.
- Wrap the MUAC tape at the mid-point - snug, not tight.
- Read the window to the nearest 0.1 cm and record immediately.

3. BILATERAL PITTING OEDEMA TEST

Press both feet with the thumbs for 3 seconds. If a pit remains in BOTH feet, classify as SAM regardless of the MUAC reading.

4. RUTF REFERRAL RULE

SAM without complications: OTP site, RUTF ration + routine medicines.

SAM with complications (no appetite, fever, oedema +++): Stabilisation Centre / hospital referral the same day.

5. WHAT THE CHV RECORDS IN CaafimaadHub

Children screened | MUAC readings | Oedema cases | Referrals issued.

Submit through 'Field Data Collection'. Works offline and auto-syncs.

Document version 1.0 - Issued for CHV training use.
